# Clément Rolinat, PhD student at CEA (Atomic Energy Commission)

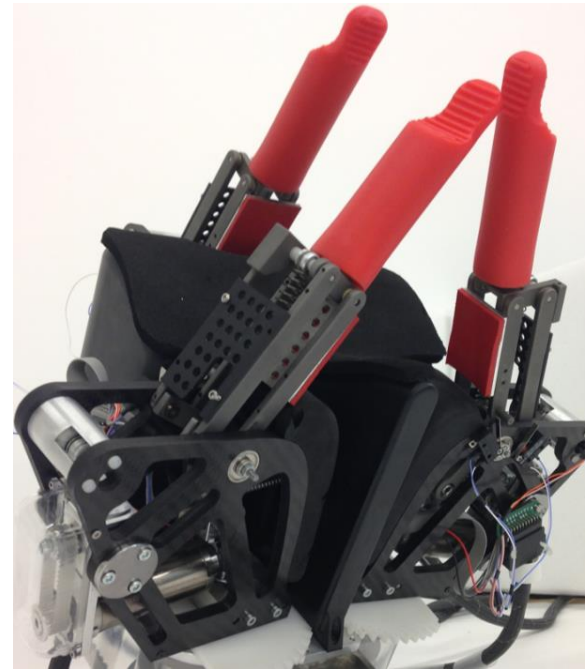

Thesis topic : learning strategies for pluri-digital robotic grasping

Grasping : fundamental task in industrial processes.

CEA: French public research institute.
Main research topics:
- Defense
- Renewable, nuclear and low carbon energy
- Technology transfer for industry
- Science of matter and life sciences

Grasp planning algorithm design goal:
- Versatility
- Grasp robustness
- Task compatibility (ex: accessibility)

Hand designed by the CEA for the European project H2020 RoMaNS
